Series Summary

In this series, we'll explore how the world around us points beyond itself to the God who made it. From the vastness of the galaxies to the complexity of life itself, creation reveals not only God's power and wisdom but also the depth of His love for us.

Together, we'll discover that the fingerprints of God are everywhere and etched into the beauty of nature, woven into the story of humanity, and ultimately revealed in His desire to know us and be known by us. As we journey through Scripture, we'll see that we are not accidents of chance, but beloved creations, carefully formed by the hands of a loving Creator.
